Summary

As a skilled Full Stack Web Developer with a background in Project Management, I create impactful software solutions from start to finish. I am dedicated to learning and updating my skills to stay current with industry trends. Known for my attention to detail and ability to solve complex problems, I take pride in writing clean, efficient code. I foster cross-functional collaborations to achieve business goals, and my transition into web development combines my managerial expertise with coding skills to drive progress toward a more efficient, inclusive, and sustainable future.
